

EPAS Kit-2 Helpful Hints when fitting our EPAS Kit to Manual Steering Systems.

The EPAS Kit-2 Unit must be installed in-between the steering wheel and the steering unit in the vehicle.

The photos below show what needs to be modified to fit one of our EPAS Kit-2 units to a manual steering System.

14mm A/F section on input shaft to fit lower output coupling.

Once the unit is installed then the system can be wired up as per the instructions.
